

Proactive School Security Technology for Real-Time Accountability

Ensure School Doors Are Locked on Schedule and Stay Locked – Every Day

Life Check Systems is a simple but powerful tool used to **prevent unauthorized intrusion** to your school buildings and reduce potential threats.

Locked doors are a first line of defense for campus security.

Life Check creates accountability to keep doors locked and sensitive areas regularly monitored.

Quick & Easy to Implement

Life Check can be implemented **with or without SROs**. Everyone from custodians to faculty to administrators can use the system, with training taking under an hour.

Never Miss a Door Check

Alarms notify personnel and supervisors if a door check is not completed. Configure timers, alerts, and notices to your specifications.

On-Demand Body Camera

With the push of a button, the body camera begins recording high-definition video and audio that automatically uploads to your admin dashboard.

How It Works

Life Check Systems is incredibly **simple to use** but brings an unparalleled level of **accountability** to your school. Setup typically takes less than a day.

1

Install Location Tags

Affix our small, all-weather NFC location tags to interior and exterior locations that should be monitored.

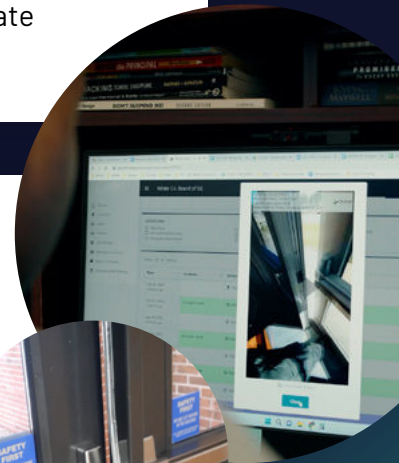

Create an **unlimited** number of locations to monitor, such as exterior doors, perimeters, parking lots, windows, bathrooms, storage areas, gates, sports areas, outbuildings and more.

2

Create Custom Security Policies

From your private administrative dashboard, customize security policies and settings according to the specific requirements for each school. Create specific schedules for each location you want to monitor.

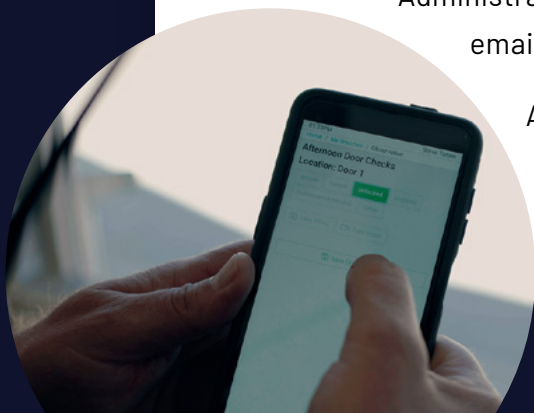

3

Scan Tags and Log Observations

Personnel must physically touch the mobile device to a location tag to log a door check. Automated prompts and voice-to-text capabilities make data entry fast and easy. You can also require photos and/or videos with every observation.

Administrators and supervisors receive call, text, and email alerts if a compliance failure is near.

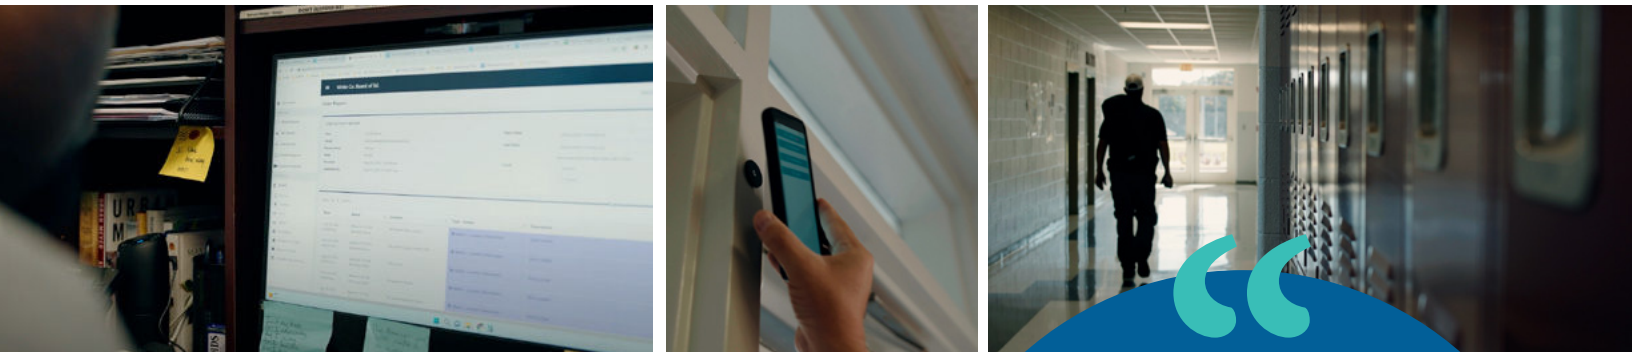

All data is automatically stored on the cloud. Administrators can view activity in real time and receive reports highlighting any missed observations or irregularities.

Increase Student Safety at Your School Now

Any law enforcement or security agency, individual school or district, or college or university can use Life Check. It is designed to be **affordable for schools of all sizes**. After initial start-up costs, pricing is an affordable monthly service fee that is all-inclusive. Fees are variable based on the size of your school, and there are no additional fees for data storage, users or devices.

Schedule Your Free Demo

See the system in action - no pressure or obligation.
